Long:

GLASS PLASTICS AND GARDEN in Munster / Lüneburg Heath

For the 12th time, international artists are invited to publicly exhibit their large-scale works of art made of glass under the theme GLASS PLASTICS AND GARDEN in the parks of the town of Munster in the Lüneburg Heath from 27 August to 18 September this year. About 46 artists have been selected for this year's exhibition and will be showing their sculptures of contemporary glass art, presented in an exciting way, in the interplay of light and shadow, embedded in nature. On the opening day, the city's art prize of 6,000 € will be awarded by an international jury. In the exhibition area, visitors can watch glassblowers making objects. Other exhibitions of small objects made of and with glass are in the historic St. Urbani Church and in the city library. Admission is free in both cases. Information also at www.glasplastik-und-garten.de
